Energies and Patterns in Psychological Type

The reservoir of consciousness

John Beebe

“At last, the long awaited volume on Psychological Types by the preeminent analyst-scholar of Jung's typology, John Beebe, MD. This distillation of a lifetime's work by John Beebe is without parallel in the study of types. Emerging out of numerous, stellar presentations and publications, based on years of teaching, leading workshops and seminars around the globe, *Energies and Patterns in Psychological Type: The Reservoir of Consciousness* will richly reward readers fortunate enough to have obtained a copy. Jung's original vision is imagined forward into the fullness of a systemic, archetypally based, theory of consciousness, which in turn is complemented by diverse applications. Not only is model amplified with a range of clinical example, but it is masterfully applied to film, history and contemporary culture. If you wish to understand the depth and importance of psychological typology, this book is essential.”

– Joe Cambray, Ph.D., Provost Pacifica Graduate Institute;
Past-President of the IAAP

“For years now, John Beebe has been clarifying and expanding Jung's theory of type. In the articles gathered for this book, ranging from the historical to the practical, from the clinical to the social and political, he charts typological processes in which different kinds of consciousness spark and react in unexpected constellations moving towards wholeness and integrity. His psychotherapeutic system is precise and generous, his tone is firm and intelligently optimistic, and his arguments are hard-edged and crystal clear. In the field of Jungian typology, this is now the essential book.”

– Craig Stephenson, author of
Possession: Jung's Comparative Anatomy of the Psyche
and *Anteros: A Forgotten Myth*

This book encapsulates John Beebe's influential work on the analytical psychology of consciousness. Building on C. G. Jung's theory of psychological types and on subsequent clarifications by Marie-Louise von Franz and Isabel Briggs Myers, Beebe demonstrates the bond between the eight types of consciousness Jung named and the archetypal complexes that impart energy and purpose to our emotions, fantasies, and dreams. For this collection, Beebe has revised and updated his most influential and significant previously published papers and has introduced, in a brand new chapter, a surprising theory of type and culture.

Beebe's model enables readers to take what they already know about psychological types and apply it to depth psychology. The insights contained in the fifteen chapters of this book will be especially valuable for Jungian psychotherapists, post-Jungian academics and scholars, psychological type practitioners, and type enthusiasts.
